

EU Regulation 2025/40 – Packaging and Packaging Waste Regulation (PPWR)
CLEVEDON FASTENERS LTD – COMPLIANCE STATEMENT

Clevedon Fasteners Ltd is committed to meeting the applicable requirements of EU Regulation 2025/40 on Packaging and Packaging Waste (PPWR).

We have reviewed the packaging materials used in the supply of our products and have contacted our packaging suppliers to obtain appropriate declarations of conformity, compliance statements and, where available, supporting test documentation.

Based upon the information and declarations currently provided to us by our supply chain, we have no reason to believe that the packaging used by Clevedon Fasteners Ltd does not comply with the applicable requirements of EU Regulation 2025/40, including the requirements relating to the concentration of lead, cadmium, mercury and hexavalent chromium.

We recognise that the availability and format of supporting documentation varies throughout the packaging supply chain. In some instances, suppliers have provided declarations or written confirmations of compliance but have not provided underlying laboratory test reports. We continue to work with our suppliers to obtain and maintain appropriate supporting documentation.

Accordingly, to the best of our knowledge and based upon the information currently available to us from our suppliers, the packaging used by Clevedon Fasteners Ltd complies with the applicable requirements of EU Regulation 2025/40.

This statement is based upon information available at the date of issue and will be reviewed and updated as further information becomes available from our supply chain.
